

Back By Popular Demand - C.P.P. Open Enrollment!

One of the many benefits of purchasing your sewing machine at **Moore's is our Complete Protection Package**. This package covers 100% of all repairs and maintenance associated with your machine. It includes the cost of all parts and labor. The **C.P.P.**, as we call it, can be purchased for any sewing machine, serger, embroidery machine, and quilting system and covers it for a period of 4 years.

In the past, this package was only available for purchase at the time of sale and could never be renewed.

Back by popular demand- Open enrollment!

The open enrollment period allows any customer to renew or purchase the Moore's Complete Protection Package for a total of 4 years. Regardless of what kind of machine you own, where you purchased it, or how old it is. During open enrollment you can add or extend your protection to 4 years.*

Our customers have enjoyed the benefits and value of this package for years.

Do the math!

Here is what we can count on: The average sewing machine serviced once a year costs you \$150-\$199 just in the yearly maintenance that you know you should perform. That's up to \$796 for four years. This is only if you service it once a year. (With the C.P.P. there is no limit to the amount of times you can bring it in.)

What about the unforeseen? The average price of a circuit board if it fails, however rare, it does happen, costs \$400.

What if the unthinkable happens? What about if your dog chews the cord, your husband drops your machine, (they always get the blame), or any other unforeseen expense? I have had several people drop their machine, (please don't drop your machine), and if they were not covered, the cost could reach well over one or two thousand dollars with some of the new top of the line embroidery machines. I can think of two cases where the machine was covered and there was no charge to the customer to complete the repairs, no questions asked!

The average sewing machine C.P.P. ranges from \$150 to \$399, based on the type of machine.

You can see why most of our customers say it's a no brainer!

Embroidery machines range from \$199 to \$699. See stores for a complete list. Multi-needle machines are slightly higher. We have rates for all makes and models of machines.

**Don't Wait! Open enrollment will be for a limited time only!
Bring your machine into your local Moore's store today.**

*Models that are not presently covered will require a CPP inspection to determine the shape of the machine. If it's determined by our service department the machine does not qualify, the C.P.P. will be cancelled and refunded. See stores for details.
