

The Janome Memory Craft 1000 is a combination sewing and embroidery machine. It is a compact and sturdy machine that is well suited for sewing a variety of projects and adding some embroidery to enhance those projects.

Here are just a few of my favorite things about this machine:

Features in the machine make the sewing and embroidery process both guided and “beginner proof”. The single needle hole plate is included with the machine. In sewing the machine recognizes the plate and blocks any stitches that do not work with the plate. Open the embroidery arm and the machine is automatically in embroidery mode.

Built in reminders, easy to follow printed owner’s manual and easy access to instructional videos via QR code are valuable resources for learning and using the machine. Only the icons to access features for a particular function (sewing for sewing features and editing features for editing embroidery) are shown on the screen and are simple to navigate with arrows on the screen. Touch screen makes it easy to select and move embroidery designs.

Embroidery is as simple as hooping fabric with stabilizer, selecting a design and threading the machine and pressing “Start”. Embroidery placement and editing has advanced features

available on more “top-of-the-line” machines such as sewing order, grouping and color change reduction.

The machine is compact and easy to store. The embroidery arm is attached to the machine and is not a separate unit to store. The machine weighs 22 pounds making it possible for most to lift and store the machine. The machine comes with a cover for protection while storage.

- **Sewing Features:**
- 300 stitches with 3 fonts and 15 applique stitches
- 12 one step buttonholes
- 2 Enhanced magnetic needle plates standard and single hole plate
- Top loading full rotary hook
- 7-piece feed dog
- Easy to use needle threader
- Automatic drop feed for free motion
- Snap on presser feet
- Extra high presser foot lift
- Auto declutch bobbin winder
- Easy set bobbin
- 2 extra bright LED lights
- Memory capability for sewing and embroidery
- Sewing speed 860 spm
- 71 needle positions for straight stitch
- Twin needle setting
- Manual thread tension
- Manual foot pressure adjustment
- 3.5” color touch screen
- Variable zig zag function with foot control
- **Embroidery Features:**
- 241 built in designs and 11 embroidery fonts
- 2 & 3 letter monograms
- Maximum embroidery size 5.5” x 5.5”
- Adjustable embroidery speed 400-660 spm
- Editing functions; resize, rotate, combine, duplicate, mirror two ways, group, color change, single-color stitching, zoom, corner duplicate and change sewing order
- Automatic jump stitch trim
- Thread break detection with auto return
- Resumption
- Design transfer via USB
- Free arm embroidery

Remote Thread Cutting Switch unit *should be used
with the Large Foot Controller only
